1974

Mechanicam vero duplicem Veteres constituerunt: Rationalem *quae per Demonstrationes accurate procedit, & Practicam. Ad practicam spectant Artes omnes Manuales, a quibus utique* Mechanica *nomen mutuata est. Cum autem Artifices parum accurate operari soleant, fit ut* Mechanica *omnis a* Geometria *ita distinguatur, ut quicquid accuratum sit ad* Geometriam *referatur, quicquid minus accuratum ad* Mechanicam. *Attamen errores non sunt Artis sed Artificum. Qui minus accurate operatur, imperfectior est Mechanicus, & si quis accuratissime operari posset, hic foret Mechanicus omnium perfectissimus.* NEWTON

La généralité que j'embrasse, au lieu d'éblouîr nos lumieres, nous découvrira plutôt les véritables loix de la Nature dans tout leur éclat, & on y trouvera des raisons encore plus fortes, d'en admirer la beauté & la simplicité. EULER

... ut proinde his paucis consideratis tota haec materia redacta sit ad puram Geometriam, quod in physicis & mechanicis unice desideratum. LEIBNIZ

The ARCHIVE FOR RATIONAL MECHANICS AND ANALYSIS nourishes the discipline of mechanics as a deductive, mathematical science in the classical tradition and promotes pure analysis, particularly in contexts of application. Its purpose is to give rapid and full publication to researches of exceptional moment, depth, and permanence.

Each memoir must meet a standard of rigor set by the best work in its field. Contributions must consist largely of original research; on occasion, an expository paper may be invited.

English, French, German, Italian, and Latin are the languages of the Archive. Authors are urged to write clearly and well, avoiding an excessively condensed or crabbed style. The editors reserve the right to return to authors manuscripts found deficient in style, form, or clarity.

Manuscripts intended for the Archive should be submitted to an appropriate member of the Editorial Board.

CONTENTS OF VOLUME 54

AHLUWALIA, D. S., E. L. REISS & S. E. STONE, A Uniform Asymptotic Analysis of Dispersive Wave Motion 340

ARONSON, D. G., & L. A. PELETIER, Global Stability of Symmetric and Asymmetric Concentration Profiles in Catalyst Particles 175

ATKINSON, F. V., & L. A. PELETIER, Similarity Solutions of the Nonlinear Diffusion Equation 373

CHADAM, J. M., & R. T. GLASSEY, On Certain Global Solutions of the Cauchy Problem for the (Classical) Coupled Klein-Gordon-Dirac Equations in One and Three Space Dimensions 223

CHANDRA, J., & P. W. DAVIS, A Monotone Method for Quasilinear Boundary Value Problems 257

COLEMAN, B. D., & D. R. OWEN, A Mathematical Foundation for Thermodynamics 1

DAVIS, P. W., see CHANDRA, J. 257

EDELEN, D. G. B., On Decompositions of Operators and Solutions of Functional Inequalities 212

FUČÍK, S., J. NEČAS, J. SOUČEK & V. SOUČEK, Krasnoselskii's Main Bifurcation Theorem 328

GLASSEY, R. T., see CHADAM, J. M. 223
